

## Merz Aesthetics Celebrates A New Milestone: Ten Million Syringes of Radiesse® Shipped Worldwide

Merz Aesthetics, a global leader in medical aesthetics, today announced that Radiesse® is celebrating ten million syringes shipped worldwide over almost twenty years. Radiesse® is a calcium hydroxylapatite (CaHA) injectable filler<sup>1</sup> used for volumisation, lifting and contouring, as well as skin rejuvenation by stimulating natural collagenogenesis.<sup>2,3</sup> Radiesse® Lidocaine delivers effective and natural-looking cosmetic results, distinguished by its established safety profile<sup>4</sup> and high patient satisfaction.<sup>5</sup>

Kristel Hectors, Head of Marketing EMEA, Merz Aesthetics. “As we are looking ahead, we are excited for what’s to come over the next years for Radiesse.”

“Radiesse is my number one go to product because of its versatility. Radiesse plus for contouring, lifting, ligaments and volumizing.” said Jani van Loghem, MD Cosmetisch arts KNMG. “It is a biostimulatory product going beyond a hyaluronic acid: the collagen will be giving the patient the final result and it is a really nice message to the patient!”
